INDEX TO VOLUME XIII.

[NOTE.—In this index the titles of principal papers and the headings of departments, as *Discussion,* are in italics.]

Abrams, D. A., on compressive strength of concrete, 593; on wear tests on concrete, 564
Abrams, D. A., and Harder, O. E., on testing organic impurities in sand, 589
Abrasion tests of gravel, 588; of sand, 593; of stone, 565, 567
Absorption of water by stone, 575
Adams, F. D., on deformation of rocks under pressure, 473
Adhesion, 340, 350
Adsorption, 339, 550
Akita oil district, Japan, 516
Allen Co., Ky., geology, 204
Allocation of war minerals, 531
Alteration, in Telkwa district, B. C., 354, 366; of granite, 6
Aluminum, 502
Alvarado mining claims, 248, 257, 272
Ames, J. S., on geology in the Great War, 145
Ammonia sulphate, 510
Analyses (*see* Chemical analyses)
Andalusite crystal, 256
Andalusite hornfels, 248
Andrews, E. B., on the geological relations of rock oil, 210
An Ka Roo Kai granite boss, 7
Anomalous dips (Shaw), 598
Anomocline, 598
Anticlinal theory of oil and gas accumulation, 208, 318; date of origination, 219
Antimony, 501
Aranzazu, gold occurrence, 259
Archean rocks, Korea, 9
Arendal, Norway, ilmenite from, 423
Arnold, Ralph, and Anderson, Robert, on the accumulation of oil, 211
Arrhenius, S., on salt deposits, 480
Arsenic, 501
Asbestos, 502
Ashburner, C. A., on oil recovery, 214; on the anticlinal theory, 219; on the geology of natural gas, 209
Atwood, W. W., on an old erosion surface in Idaho, 120
Auric oxide, 163
Austin, C. L., analysis by, 613
Auvergnose, analysis of, 187

Bain, H. F., on determination of pore space in rocks, 215
Baker, M. B., on the geology of Kingston, 201
Balcones fault, 478
Barrell, Joseph, on pegmatites in Montana, 189
Barriefield, Ont., quaquaversal structure, 202
Basalt, Korea, 8
Bastin, E. S., *War time mineral activities in Washington,* 524–537; on Cobalt ores, 385; on the pegmatites of Maine, 189
Bateman, Alan M., *A tungsten deposit near Fairbanks, Alaska,* 112–115; discussion by, 222
Batholith, Suan Mining Concession, 3
Bauxite, 502
Becker, G. F., on lateral pressure, 482; on the force of growing crystals, 461
Bedrock deposits of road materials, 560
Bendigo gold field, geology, 101
Bendigo quartz veins, Replacement in, and its relation to gold deposition (Stillwell), 100
Bendigo quartz veins, origin, 538
Bergeat, Alfred, on the Aranzazu zone, 259
Bibliography, oil migration, 347
Birch Creek schists, 113
Bird, R. M., and Calcott, W. S., on the association of vanadium with petroleum and asphalt, 57
Bismuth, 502
Blackwelder, E., on geology of Liaotung Peninsula, 9; on the age of the Idaho-Washington peneplain, 121
Blake, W. P., on the Deep Creek district, Utah, 249

INDEX TO VOLUME XIII.

[NOTE.—In this index the titles of principal papers and the headings of departments, as *Discussion,* are in italics.]

Abrams, D. A., on compressive strength of concrete, 593; on wear tests on concrete, 564
Abrams, D. A., and Harder, O. E., on testing organic impurities in sand, 589
Abrasion tests of gravel, 588; of sand, 593; of stone, 565, 567
Absorption of water by stone, 575
Adams, F. D., on deformation of rocks under pressure, 473
Adhesion, 340, 350
Adsorption, 339, 550
Akita oil district, Japan, 516
Allen Co., Ky., geology, 204
Allocation of war minerals, 531
Alteration, in Telkwa district, B. C., 354, 366; of granite, 6
Aluminum, 502
Alvarado mining claims, 248, 257, 272
Ames, J. S., on geology in the Great War, 145
Ammonia sulphate, 510
Analyses (*see* Chemical analyses)
Andalusite crystal, 256
Andalusite hornfels, 248
Andrews, E. B., on the geological relations of rock oil, 210
An Ka Roo Kai granite boss, 7
Anomalous dips (Shaw), 598
Anomocline, 598
Anticlinal theory of oil and gas accumulation, 208, 318; date of origination, 219
Antimony, 501
Aranzazu, gold occurrence, 259
Archean rocks, Korea, 9
Arendal, Norway, ilmenite from, 423
Arnold, Ralph, and Anderson, Robert, on the accumulation of oil, 211
Arrhenius, S., on salt deposits, 480
Arsenic, 501
Asbestos, 502
Ashburner, C. A., on oil recovery, 214; on the anticlinal theory, 219; on the geology of natural gas, 209
Atwood, W. W., on an old erosion surface in Idaho, 120
Auric oxide, 163
Austin, C. L., analysis by, 613
Auvergnose, analysis of, 187

Bain, H. F., on determination of pore space in rocks, 215
Baker, M. B., on the geology of Kingston, 201
Balcones fault, 478
Barrell, Joseph, on pegmatites in Montana, 189
Barriefield, Ont., quaquaversal structure, 202
Basalt, Korea, 8
Bastin, E. S., *War time mineral activities in Washington,* 524–537; on Cobalt ores, 385; on the pegmatites of Maine, 189
Bateman, Alan M., *A tungsten deposit near Fairbanks, Alaska,* 112–115; discussion by, 222
Batholith, Suan Mining Concession, 3
Bauxite, 502
Becker, G. F., on lateral pressure, 482; on the force of growing crystals, 461
Bedrock deposits of road materials, 560
Bendigo gold field, geology, 101
Bendigo quartz veins, Replacement in, and its relation to gold deposition (Stillwell), 100
Bendigo quartz veins, origin, 538
Bergeat, Alfred, on the Aranzazu zone, 259
Bibliography, oil migration, 347
Birch Creek schists, 113
Bird, R. M., and Calcott, W. S., on the association of vanadium with petroleum and asphalt, 57
Bismuth, 502
Blackwelder, E., on geology of Liaotung Peninsula, 9; on the age of the Idaho-Washington peneplain, 121
Blake, W. P., on the Deep Creek district, Utah, 249

Blanchard, A. A., on the cone specific gravity method, 586
Blatchley, R. S., on the occurrence of oil in Illinois, 211
Blebs, use of term, 97
Block diagrams of topography, use in war, 146
Bomb of chrome vanadium steel, 168
Bore holes, temperature measurements in, 278
Bowen, N. L., on the evolution of igneous rocks, 192, 196
Bownocker, J. A., on porosity of Berea grit, 322
Brecciation in quartz, 104
Broderick, T. M., *Some features of magnetic surveys of the magnetite deposits of the Duluth gabbro*, 35–49
Brooks, A. H., letter concerning J. D. Irving, 554
Buckley, E. R., on determination of pore space in rocks, 215
Building stones and clays (Richardson), review of, 70
Bulkley intrusives, 352
Burgess, J. A., discussion by, 546; on origin of haloid salts at Wonder, Nev., 224
Butte district, physiographic features, 131

Calcification of wood, 116
Calcite, 360
Calcite, The replacement of wood by (Greenland), 116
Cameron, F. K., on solubility of gypsum, 618
Campbell, M. R., on the occurrence of oil in rocks, 212; on theories of oil accumulation, 316
Camptonose, analysis of, 187
Cane Springs mining claim, 248, 257, 272
Cap rock of salt domes, origin, 616
Capillary concentration theory of oil accumulation, 319
Capillary interstices, 208
Capillary pressure of oil and water, 340
Capital Issues Committee of the Federal Reserve Board, 535
Carbonates, insoluble, action toward gold solutions, 164
Carnegie swamp or trench, 599
Carnotite, 50, 51; publications on, 50; solubility, 57; synthesis attempted, 58
Carnotite deposits, 52; at Mauch Chunk, Pa., 53
Cavities in oil sands, 207; in rocks, 320
Cementation, 342
Cementation test of rock, 566, 573, 577
Ceylon graphite, 507
Chalcocite, 359, 364, 369; origin in Engels ores, 91
Chalcopyrite, 359, 365
Chalk, 502
Chamberlin, R. T., and Miller, W. Z., on low-angle faulting, 606
Chañarcillo Mines, Chile, haloids of, 225
Chance, H. M., on estimating underground oil resources, 214
Chemical analyses—granite, average composition, 143; ilmenite, 422, 424, 434; magnetite, 437; nickel eruptive, 143; olivine gabbro, 187; pegmatitic gabbro, 187; racewinite, 613; sudburite, 143
Chemical causes of oil migration, 337, 342
Chemical experiments bearing on the origin of certain uranium-vanadium ores (Notestein), 50
Chester Hill, Mass., ilmenite from, 438
Chil Sing Dei granite, 7
Chloritic quartz, 106
Chromite, sources, 503
Clapp, C. H., review by, 400
Clapp, F. G., on the occurrence of oil, 211; on the occurrence of natural gas in Ontario, 203
Clark, K. A., and Reinecke, L., on sampling deposits of road materials, 561
Clark, W. O., on estimating underground water resources, 214
Clarke, F. W., on haloids in sea water, 224; on pseudo-serpentine from Stevens Co., Wash., 381; on the occurrence of vanadium, 52
Classification, causes of dips, 604; of oil migration, 337, 343
Clay, imported and domestic, use of, 504; literature on, 76, 240
Cleland, H. F., discussion by, 145
Clements, J. M., *Petroleum in Japan*, 512–523
Clendenin, W. W., on the origin of salt domes, 455
Clifton Hills, Utah, 249; mining activity, 247

Coal, literature on, 74, 238
Cobalt, Ont., ore deposits, 385
Coleman, A. P., average analysis by, 143
Collbran contact of the Suan Mining Concession, Korea, Geology and ore deposits of (Higgins), 1
Collbranite, 19
Colorimetric tests of for organic impurities in sand, 589
Columbia River basalt, 488
Comcar formation, 281
Committee on Mineral Imports and Exports, 530
Committee on Public Information, 536
Concentration of oil and gas, 344
Contact metamorphism, Suan Mining Concession, 16
Contact-metamorphic deposits, Gold Hill district, Utah, 271
Contact-replacement deposits, Gold Hill district, Utah, 273
Contacts, Tul Mi Chung, 4
Contour map of dip needle deflections, 38
Copper, as a war mineral, 505; literature on, 71, 233; Telkwa district, B. C., 355
Copper ore, Gold Hill district, Utah, 262, 270
Copper silver veins of the Telkwa district, British Columbia (Dolmage), 349
Cost of macadam road, 560
Coste, Eugene, on natural gas in Ontario, 209; on the origin of salt domes, 455
Craig, E. H. C., on the accumulation of oil, 211; on the action of oil on reservoir rocks, 216
Crawford, W. G., experiments on gold hydroxide, 172
Creep in strata, 609
Crevices and cavities in oil sands, 207
Crew, B. J., on the occurrence of oil, 210
Crocidolite, 502
Crook and Jones, analysis of picroilmenite by, 428
Crook, T., and Blake, G. S., on carnotites, 50
Crosby, W. O., and Fuller, M. L., on pegmatites in Massachusetts, 189
Crossbedding, 602
Cryolite, 505
Cumberlandite, 432
Curves of mineralization, Suan Concession, 21
Cushing, H. P., on superficial folds, 200
Cushman, A. S., on the effect of water on rock powders, 573
Cyanite, 256

Dale, T. N., on dikes of pegmatite in Vermont, 189
Daly, M. R., on static friction in rocks, 217; on the diastrophic theory, 220
Daly, R. A., average analysis by, 143; on gases in rock crystallization, 85; on pegmatites in British Columbia, 189; on underground volatile agents, 144
Darwin, G. H., on variations in vertical due to elasticity of earth's surface, 217
Dawson, G. M., on the Eocene age of the Idaho-Washington peneplain, 123
Deep Creek Valley, Nevada, 251
DeGolyer, E., *The significance of certain Mexican oil field temperatures*, 275–301; discussion by, 616; on fissures in oil rocks, 212; on the origin of salt domes, 454
Deposition of gold in nature, Further studies on (Lenher), 161
Deposition of strata on uneven floor, 209
Deussen, Alex., on salt domes, 449
Diagrams—andalusite crystal, 256; mineralization, Suan Concession, 20; occurrence of natural gas in Ontario, 203; quaquaversal structure at Barriefield, Ont., 202
Diapir fold, 467
Diemer, on the reduction of auric chloride, 174
Differentiation of pegmatites, 196
Dike, pegmatite, 189
Diopside, 18
Diorite, 6
Dip, original, causes of, 200
Dip needle deflections, contour map of, 38
Dips, Anomalous (Shaw), 598
Discussion—
Crevices and cavities in oil sands (Shaw), 207
Genetic classification of underground volatile agents (Emmons), 144
The geologist in war time—geol-

ogy on the Western Front (Cleland), 145
The geologist in war times: relation to military water supplies (Meinzer), 314
The geologist in war times: The United States Geological Survey's war work (Smith), 392
Halogen salts of silver at Wonder, Nevada (Burgess), 546; (Young), 224
The Idaho peneplain (Lindgren), 486; (Livingston), 488
Intrusive origin of the Gulf Coast salt domes (Jones), 621
Magmatic ore deposits of Sudbury, Ontario (Goodchild), 137
Movements of oil and gas through rocks (Washburne), 550
The occurrence of the halogen salts of silver (Lindgren), 225
Origin of the Bendigo quartz veins (Taber), 538
Origin of the cap rock of the Gulf Coast salt domes (DeGolyer), 616
Occurrence of the silver halides in the oxidized zone of ore deposits (Knopf), 622
The petrology of reservoir rocks and its influence on the accumulation of petroleum (Jones), 147; (Rogers), 316
Petrology of reservoir rocks (Lewis), 65
Replacement in the Bendigo quartz veins (Bateman), 222
Silver deposition and enrichment at Cobalt, Ont. (Reid), 385
Dobie, Walter, on negative magnetic lines, 41
Dolmage, V., *The copper silver veins of the Telkwa district, British Columbia*, 349–380
Dolomite, value for road building, 579
Dome structure in Ontario, 203
Domes, salt, origin of cap rock, 616
Dorsey, Hager, on faulting in oil fields, 211
Drilling in Japanese oil fields, 513
Duluth gabbro, Some features of magnetic surveys of the magnetite deposits of the (Broderick), 35
Duluth gabbro, The pegmatites of (Grout), 185
Dumble, E. T., on the occurrence of petroleum, 453
Dunn, E. J., on the Bendigo gold field, 103, 539
Durham, H. W., on street paving, 580
Dutch Mountain, Utah, geologic column, 263

Echigo oil district, Japan, 513, 515
Economic geology, principles of, 325
Economic geology, recent literature on, 71, 233
Egersund, Norway, ilmenite from, 434
Emmons, S. F., on Cobalt ore deposits, 387
Emmons, W. H., discussion by, 144; review of book by, 325; on enrichment of ore deposits, 390
Emmons, W. H., and Harrington, G. L., on ground waters, 56
Engels, California, Further remarks on the ores of (Graton and McLaughlin), 81
Enrichment at Cobalt, Ont., 385; at Superior mine, 92
Erosion surface in Idaho: is it Eocene? (Rich), 120
Excelsior claim, Telkwa district, B. C., 356, 358
Experiments on gold hydroxide, 172; on salt crystals, 474; on uranium and vanadium, 56; to show distortion of earth's magnetic field, 45; with Iceland spar and gold chloride, 175
Experiments bearing on the origin of certain uranium-vanadium ores, Some chemical (Notestein), 50
Export conservation list, 531

Fairbanks, Alaska, A tungsten deposit near (Bateman), 112
Fairbanks district, Alaska, physical features, 113
Faulting, Bendigo gold field, 106; Llano-Burnet region, Texas, 479
Federal Reserve Board, 535
Federal Trade Commission, 528
Fenneman, N. M., on salt domes, 449
Fenner, C. N., on magmatic differentiation, 195
Fissuring in oil fields, 323
Fleck, H., and Haldane, W. G., on origin of carnotite deposits, 55
Flint-grinding pebbles, 505
Flow structure in salt, 470
Flowage in strata, 608

Folding, superficial, 200
Free, E. E., on dry sands, 216
Frontenac County, Ont., molybdenite deposits, 312
Fuller, M. L., on estimating underground water resources, 215
Fuller's earth, 506
Furnace, heating, construction, 169
Further remarks on the ores of Engels, California (Graton and McLaughlin), 81
Further studies on the deposition of gold in nature (Lenher), 161

Gabbro, analyses of, 187
Gale, H. S., on origin of carnotite deposits, 55
Galena, 359
Galloway, J. D., on chalcopyrite, 376
Gardner, J. H., on local folding, 606
Gas, in Japanese oil districts, 518; movement through rocks, 550
Gas pressure, 343
Gems, literature on, 76, 240
Genesis of dips, 604; of Suan deposits, Korea, 12, 19; of Telkwa district ore deposits, 361, 368 (*see also* Origin)
Genetic classification of cause of dips, 604
Geologic maps—Clifton (Deep Creek) district, Utah, 261; Gold Hill district, Utah, 261; Gold Hill mine, 264; Suan Mining Concession, 3 (*see also* Maps)
Geology, Allen Co., Ky., 204; Bendigo gold field, 101; Clifton district, Utah, 251; Ely, Nevada, 400; Japanese oil fields, 515; northeastern Mexico, 280; Pontiac Co., Quebec, 302; salt dome region, 478; Telkwa district, B. C., 350
Geology and ore deposits of Ely, Nevada, review of, 400
Geology and ore deposits of the Collbran contact of the Suan Mining Concession, Korea (Higgins), 1
George, R. D., on pegmatites in Colorado, 193
Geothermal gradient, 297
Gidel, M. H., experiments on copper formation, 270
Gilbert, G. K., on superficial folds, 200
Glacial boulder deposits, for road making, 580
Gneiss, tests on, for road building use, 578
Goesmann, C. A., and Buck, C. E., on the origin of salt domes, 456
Gold, deposition of, in nature, Further studies on (Lenher), 161
Gold, literature on, 72, 234; occurrence in Bendigo field, 108; native, 258
Gold deposition, Replacement in the Bendigo quartz veins and its relation to (Stillwell), 100
Gold deposits of the Rand (Horwood), review of, 150
Gold hydroxide, 165; behavior when heated, 166, 167; experiments on, 172
Gold oxide, 163
Gold solutions, effect of insoluble carbonates on, 164
Gold Hill, Utah, geologic column, 263; mine, 262
Gold Hill and vicinity, Tooele County, western Utah, Notes on (Kemp and Billingsley), 247
Goodchild, W. H., discussion by, 137
Granodiorite, 260
Graphic structure in ores, 97
Graphite as a war mineral, 506
Graton, L. C., and McLaughlin, D. H., *Further remarks on the ores of Engels, California*, 81–99
Gravel, abrasion tests, 588; influence of texture in road construction, 590; specific gravity determination, 587
Gravel deposits for road making, 583
Gravitative causes of oil migration, 338
Greenland, C. W., *The replacement of wood by calcite*, 116–119
Grenville series, Quebec, 302, 304
Grout, Frank F., *The pegmatites of the Duluth gabbro*, 185–197
Gulf coast salt domes, Intrusive origin of the (Rogers), 447
Gypsum, solubility, 619

Hager, Dorsey, on estimating underground oil resources, 214
Hager, Lee, on the origin of salt domes, 449, 455
Hahn, F. F., on the form of salt deposits, 454, 465
Halides, silver, in ore deposits, 622
Halogen salts of silver at Wonder, Nev., 224, 225, 546
Hardin, on silver hydroxide, 166
Hardness test of stone, 566, 573
Harker, A., on igneous rocks, 310

Harrington, analysis by, 437
Harris, G. D., on the origin of salt domes, 449, 456, 459
Hayes, C. W., on the action of organic matter on rocks, 216
Hayes, C. W., and Kennedy, Wm., on salt domes, 449
Hazelton formation, 350
Heat, of saline domes, source, 299; loss in oil wells, 299
Heat-measuring device, 170
Heating furnace, construction, 169
Heaving of Niagara limestone at Chicago, 601
Hematite, 365
Hess, F. L., on origin of carnotite ores, 55; on formula for carnotite, 51
Hickey, P. J., analysis by, 613
Higgins, D. F., *Geology and ore deposits of the Collbran contact of the Suan Mining Concession, Korea*, 1–34
Highland Boy mine, mineral from, 611
Highway engineering, 557
Hilgard, E. W., on the origin of salt domes, 455
Hill, R. T., on the origin of salt domes, 456
Hillebrand, W. F., on the occurrence of vanadium, 55
Hoden Oil Company, Japan, 514, 521
Hol Kol granite, 6
Hol Kol limestone, 4
Hopkins, O. B., on salt domes, 449
Hotchkiss, W. O., on magnetic surveys, 36, 40
Howe, Ernest, review by, 227
Hubbard, L. L., on the geology of oil-bearing rocks, 210
Hubbard, P., and Jackson, F. H., Jr., on tests of road building rocks, 576
Hunt, T. S., on the anticlinal theory of oil accumulation, 209
Hunt, W. F., on sulphur associated with salt, 483
Hydrodynamic pressure, 339
Hydrothermal ore, 87
Hydroxide of gold, 165
Hydroxide of silver, 166
Hypabyssal, use of term, 605

Iceland spar and gold chloride, experiments on, 175
Idaho, relief map, 488
Idaho peneplain, 486, 488
Igneous activity, northeastern Mexico, 282
Igneous rocks, Suan Mining Concession, 5
Iki, T., on Echigo oil field, 516
Ilmenite, 420; from Arendal, Norway, 423; from Miask, Russia, 421; from Snarum, Norway, 425
Ilvaite, 19
Induced polarity of magnetic bodies, 46
Induced porosity of rocks, 317, 320
Induration of sediments, 603
Insizwa ore deposits, 140
Intergrowths of minerals, 421
Interstices in rocks, 208
Interstitial porosity, 317
Intratelluric causes of oil migration, 337, 342
Intrusion, mechanics of, Suan Concession, 14
Intrusive origin of the Gulf coast salt domes (Rogers), 447
Intrusive theory of salt dome origin, 467
Investigation of road materials, 559
Iodine, reactions in oxidizing zone, 623
Iron, literature on, 71, 233
Iron ore, 507
Iron Mountain, Wyo., ilmenite from, 429
Irving, John Duer (Lindgren), 413; letters concerning his work in France, 553
Iserine, 436

Jackson, F. H., Jr., on toughness test for rock, 571
Jenkins, O. P., *Notes on the possible origin of the magnesite near Valley, Washington*, 381–384
Johnson, D. W., on block diagrams, 146
Johnson, R. H., and Huntley, L. G., on oil reservoirs, 212
Johnston, John, and Adams, L. H., on properties of salt, 475; on temperature measurements in bore holes, 280
Joint Information Board of Minerals and Derivatives, 535
Jones, W. F., discussions by, 147, 621

Kemp, J. F., review by, 150
Kemp, J. F., and Billingsley, Paul, *Notes on Gold Hill and vicinity, Tooele County, western Utah*, 247–274

Kennedy, A. E., and Schurig, O., on the tractive power required on roads, 568
Kennedy, William, on the origin of salt domes, 455; on temperatures of oils in saline dome region, 296
King, F. H., on estimating underground water resources, 215
King vein, Telkwa district, B. C., 372
Knight, C. W., on Sudbury ore deposits, 139
Knopf, Adolph, discussion by, 622
Korea, Geology and ore deposits of the Collbran contact of the Suan Mining Concession (Higgins), 1
Korea granite, 9
Koto, B., on ilvaite, 19
Kragerö, Norway, ilmenite from, 424
Krüss, on hydroxide of gold, 165

Laboratory tests of road materials, 565
Lachmann, R., on salt deposits, 480
Lake Sanford, N. Y., ilmenite from, 431
Lattice structure, origin, 96
Lauer, A. W., discussion of paper by, 147, 316; on oil and gas reservoir rocks, 207
Laurentian system, Quebec, 302, 303
Lea, M. C., on silver hydroxide, 166
Lead, literature on, 72, 235
Leith, C. K., *"War minerals" as a science*, 497–511
Lemhi County, Idaho, map, 126
Lenher, Victor, *Further studies on the deposition of gold in nature*, 161–184
Lerch, Otto, on the origin of salt domes, 455
